- Data Structures And Algorithms
- Web Development

**PROJECTS**

---

**Namaste Kutumbh :** Namaste Kutumbh merges travel with homestays when giving exposure in personalization and culture-based experiences and includes different varieties in travel stay local.

- Developed a completely user-friendly platform for variety of stay options-hotel and homestays-enhancing travel experiences.
- Conducted rigorous functional and usability testing to ensure seamless user experiences across travel and stay-related features.

**Black Collar:** Black Collar is connecting job opportunities for uneducated and underprivileged sections of society to working dignifiedly in a world today.

- Create a platform facilitating such men to have access to work opportunities across various sectors.
- Empowered marginalized communities\*\* through avenues such as unguided doors to reputable employment opportunities, sustaining them economically.

**FitTrack:** A contemporary, user-friendly website for a gym that allows users to view services, reserve classes, manage memberships, and register their fitness growth.

- Validated web application functionality through test case creation, execution, and defect reporting.
- Member Management: Build personalized dashboards for members to manage subscriptions and book classes, and track fitness progress.
- Admin Panel: Built an intuitive admin panel to manage users, memberships, class schedules, and view analytics for further gym management.
